FOR IMMEDIATE RELEASE

Bay Area Tutoring Association Celebrates 10 Years of Community Impact

San Francisco Bay Area, CA — At the beginning of 2024, [Bay Area Tutoring Association](#) celebrated 10 years of service in the San Francisco Bay Area. As a minority-led, educational services charitable organization, this milestone underscores its commitment to diversifying the educator system pipeline, closing the achievement gap in underserved communities, building strategic partnerships, and providing college and career readiness academic support to [school districts](#), [foster](#), [homeless](#), underserved and migrant youth.

Since 2014, Bay Area Tutoring Association has had an economic impact, workforce impact, and community service impact committed to:

- **Strengthening educational equity through collaboration:** By partnering with over 50 organizations, the Bay Area Tutoring Association creates a collaborative network that expands educational resources and ensures a wider reach within the community. This ensures that even more students have access to the support they need.
- **Empowering Students:** The Bay Area Tutoring Association has successfully provided high dosage tutoring, after school ELA and math interventions, individualized tutoring, STEM summer camps and computer coding instruction to students all over the Bay Area, equipping them with the skills and knowledge to succeed in school and their future careers.
- **Investing in the future through tutor training:** The organization's commitment to training over 500 tutors demonstrates its investment in building a highly skilled workforce prepared to guide and inspire students. This not only benefits current students but also strengthens the tutoring ecosystem for future generations.

- **Delivering a quantifiable impact:** Surpassing 350,000 hours of instruction is a powerful testament to the Bay Area Tutoring Association's dedication to the community. This significant investment in student learning translates into tangible progress and brighter futures for countless individuals.

“Jonathan” entered BATA’s program for at-risk middle school students as a sixth-grader. He received 18 months of academic tutoring, life skill training and emotional support aimed at preventing the cycle of school failure and delinquency. Jonathan cheerfully explains that “fail” means “first attempt in learning.” Now he is an enthusiastic eighth grader, saying “My mentor is cool; he’s fun and plays games with me. He likes science.” Jonathan now finds it is easier to express himself, enjoys making new friends and is doing well in school, something he and his parents never thought possible.

[Chris Norwood](#), Founding Director of Bay Area Tutoring Association states, "We launched the Bay Area Tutoring Association ten years ago in response to low math, reading, science and digital literacy test scores in underserved school districts and communities. Many of the academic gains and tutoring communities we built have been decimated by the pandemic. While we celebrate this milestone of existence, the need for high quality tutoring programs, professionals, and programs is greater than ever."

About Bay Area Tutoring Association

The Bay Area Tutoring Association is a dynamic network of education professionals, tutors, parents, and community members dedicated to fostering the future prosperity of San Francisco Bay Area students, adult learners, and residents. As a charitable educational service organization, our mission centers on providing culturally sensitive, trained academic tutors to parents, schools, and partners, empowering parents to advocate for their students, and creating innovative STEAM, ELL, Common Core, Computer Science, and Test Prep programs. These initiatives are designed to serve foster,

homeless, justice engaged, and migrant youth. They complement academic instruction across public, private, and homeschool settings, ensuring comprehensive support for the community's educational needs. For more detailed information, please visit [Bay Area Tutoring Association](#).
